March 12, 2020

Dear CCCS Families:

We want you to know we are monitoring the Coronavirus (COVID-19) situation closely. We are in close communication with the Butte County Public Health Department, Butte County Office of Education, the California Department of Education, the State of California, Butte County Charter Leaders, and Chico Unified School District. We are doing our utmost to secure a safe environment for all at Children’s Community Charter School.

We know you may be concerned about COVID-19. The following article has some great Q&A regarding the virus and schools. CCCS will do everything to keep you updated as this progresses.

What California Parents Should Know About COVID-19

As a school, we will continue to stay up to date on current information and share it with you. In today’s connected world, outbreaks of diseases are always a concern. As with seasonal flu and strep infections, there are some precautions that we can take to remain as healthy as possible as a community.

1. Wash your hands often with soap and water.
2. Cover your cough and sneezes with a tissue or corner of your sleeve. Do not use your hands.
3. Avoid touching your face with unwashed hands, especially your mouth, nose and eyes.
4. Avoid close contact with sick people.
5. Stay home if you are sick, especially from work, school and public places.
6. Clean and disinfect frequently touched objects and surfaces.

It is important to keep children home from school and classes when they are ill. If your child has any combinations of the following symptoms please keep them home from school; temperature, respiratory symptoms, fever, shortness of breath and breathing difficulties.

Our teachers are working and preparing for online learning in the event we have a possible facility closure. As the COVID-19 is a developing health crisis, we will continue to monitor and adjust as new information becomes available. This situation is fluid and we may need to adjust our schedule to meet the health and safety needs of our community.

Thank you for your continued support,

Dr. Michelle Farrer
