

**CCCS Response to COVID-19
A Safe Reopening Plan
July 2020**

What is COVID-19?	COVID-19 is caused by a novel (new) coronavirus and is known to cause respiratory infections ranging from the common cold to more severe diseases.
How does COVID-19 spread?	The disease spreads through person to person through small droplets from the nose or mouth, which are expelled when a person with COVID-19 coughs, sneezes, or speaks. People can catch COVID-19 if they breathe in these droplets infected with the virus. They can also catch it from touching hard surfaces that are contaminated with the virus.
What are some symptoms?	Symptoms can appear 2-14 days after exposure. Symptoms of COVID-19 include, but are not limited to: Fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea
Where are we getting our information? What is guiding our plan?	We are closely working with the Butte County Office of Education , the Butte County Public Health Department , the State of California , the Centers for Disease Control & Prevention (CDC) , the American Academy of Pediatrics and the California Department of Health as our resources to guide us.
Input from stakeholders	Our school has surveyed staff and families about a return to school. We are also hosting a Town Hall as a platform for discussion.
Our Educational Pathways during COVID-19	<ol style="list-style-type: none"> 1. Face-to-face instruction with safety measures in place 2. Independent Study/Homeschool 3. Distance Learning - Virtual learning

1. Face-to-Face Instruction	Cohorts of students
2. Independent Study/Homeschool **See AB 98	This is packet learning - the general Ed teacher will monitor packet learning. The learning will mirror what is happening in class. The content learning is delivered by the parent. The student/parent has a once a week meeting with the general Ed teacher and or support staff for ½ hour a week. If the student needs more tutoring, a 1:1 virtual meeting with our support team is available upon request. Grades are a pass/incomplete.
3. Distance Learning	In the event our school building is closed due to COVID-19, learning will continue via Distance Learning. All students will be required to attend virtual learning via a Zoom or Google Meet platform (to the extent possible). Students will also be required to engage in daily learning (independent practice, group projects, online learning platforms).
Can parents choose which pathway?	Yes (sort of)! Unless and until the State determines that it is safe to conduct “traditional” on-site instruction, parents can choose between Face-to-Face instruction and Independent Study/Homeschool. Once full, traditional on-site instruction resumes, requests for independent study will be governed by the school’s policy and decided on a case by case basis.
Collective Safety	Our school cannot do this alone! Our goal is for our school to be open, therefore, we all need to do our part to stay open in school and out of school. This is a shared responsibility.
Entering school	Prior to leaving home, to minimize frustration for all involved, we strongly encourage parents to take their child’s temperature. Upon arrival at school, all staff and students will be temperature screened, and all will sanitize hands before entering the campus. Short questions will be asked to determine all

	students and staff are free of COVID like symptoms. Anyone with a temperature at or above 100.4 will be sent home.
Cohorts of students	A “cohort of students” is defined as a group of students who remain with each other all day (classroom). All students will remain with their cohorts throughout the day (playground, classroom, lunch, etc.).
Increased cleaning	We have increased staff to address the extra sanitation that will happen everywhere and all day long. Staff and students will be trained on hygiene. We have installed hand sanitizers in all spaces on the campus. We use FDA approved cleaner and all staff are trained on safety measures concerning COVID-19 using SafeSchool modules.
Physical Distancing	We will follow the guidelines from CDC, CDE, and AAP . Students will physically distance 3 - 6 feet. We will also use plexi-glass dividers to increase safety when needed.
Face covering/Masks **School will provide **Masks from home are encouraged **Have students practice wearing masks prior to school starting **Please wash cloth face coverings regularly	We will follow requirements set forth by the Governor and the CDPH. Staff: All staff will wear a face covering Students: All students are required to wear a mask while entering school, standing in line, and when they come within 3 to 6 feet of distance of someone. TK-2 grade masks are recommended. 3-8 masks are required. Per CDPH, students will be excluded if they refuse to wear a mask and they do not have an exemption. Exemptions: We will adhere to the ADA and CPHD guidelines on exemptions, which will be considered on a case by case basis. Please inform the office in writing of the basis for an exemption. Please provide a doctor note at your earliest convenience.
Plexi-glass	Our classrooms, office space, and food service locations have been outfitted with plexi-glass as an increased measure of safety.
Clean Air Filters	All classrooms and office space have an extra

	layer of safety with clean air filtration systems along with a brand new heating and air conditioning system.
Water	CCCS does not have any water fountains. Students are free to fill up their reusable water bottles with fresh clean drinking water at our water station (in the kitchen).
After School Program	For committed cohorts only (depending on which plan we are in)
Field Trips	Reserved. (depending on which plan we are in)
Visitors	Reserved. (depending on which plan we are in)
Assemblies	Reserved. (depending on which plan we are in)
Recess	Cohorts only Playground equipment - cleaned after each use Physical distancing monitored Masks – need to be put in a brown paper bag while at recess
How can families help?	We are in this together! <ul style="list-style-type: none"> ● Check your child for fever daily ● Continue to physically distance ● Wear a face covering when in public ● Keep cloth face coverings clean ● Increase hand washing ● Avoid touching your eyes, nose or mouth ● Keep your child home if they are sick ● Stay in close communication with our child’s teacher ● Provide input when surveys or questionnaires come home ● Visit our website often for updates and important information
What if your child is sick?	Please refer to the CDC guidelines for if your child is sick.

Quarantine if sick	Please refer to the CDC guidelines on when to quarantine.
Return to school	Please refer to the CDC guidelines for a return to school.
Scenario #1	A student or staff member has a fever or shows signs of COVID-19. The students/staff member is sent home until the symptoms are cleared (see return to school). The cohort remains open.
Scenario #2	A family member tests positive. The student/staff member will be in quarantine for 14 days. The cohort remains open. Families in the cohort are notified of the exposure.
Scenario #3	A student/staff member tests positive. The families are quarantined. The cohort is closed from 14 days of the last day of exposure. Families in the cohort are notified of the exposure.
Scenario #4	After a student/staff member tests negative and there is a resolution of symptoms, they may return to school after 3 days.
