

STUDENT CLOSE CONTACTS SCHOOL SETTINGS ONLY

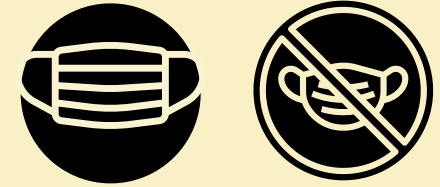

Please check with individual school as some schools may choose to be *more* restrictive than this graphic. Last updated 10/01/21

Close contact* - asymptomatic UNVACCINATED, UNMASKED

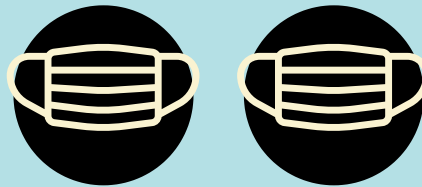

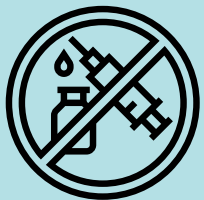

- Quarantine at home.
- Quarantine ends after **Day 10** from the last day of exposure.
- Student(s) may return to school on **Day 11** as long they are masked at all times on school campus (*both indoors and outdoors*).

Close contact* - asymptomatic VACCINATED, MASKED/UNMASKED

No quarantine is necessary for fully vaccinated students, either masked or unmasked, as long as **asymptomatic**.

Close contact* - asymptomatic UNVACCINATED - ONLY IF BOTH WERE MASKED

- Mask-to-mask, indoor school exposure allows for a possible modified student quarantine where students can continue to attend school if they agree to adhere to the below guidance:
 - Does not participate in extra curricular activities in school or community settings (i.e. *sports, after-school programs, etc.*) until end of quarantine period
 - If asymptomatic, continues to wear mask indoors, undergo at least twice weekly testing during the 10 day modified quarantine.

If a close contact* is SYMPTOMATIC (Vaccinated/Unvaccinated)

- Remove from school, isolate at home, and get tested for COVID-19.
- If the test is a confirmed positive, isolate at home and call your student's school.

POSITIVE CASE

Full at-home isolation for 10 days regardless of vaccination status and mask-wearing

*Close contact is defined as within 6 feet for 15 cumulative minutes within a 24-hour period of someone with a confirmed case of COVID-19 (masked or unmasked).

STAFF CLOSE CONTACTS

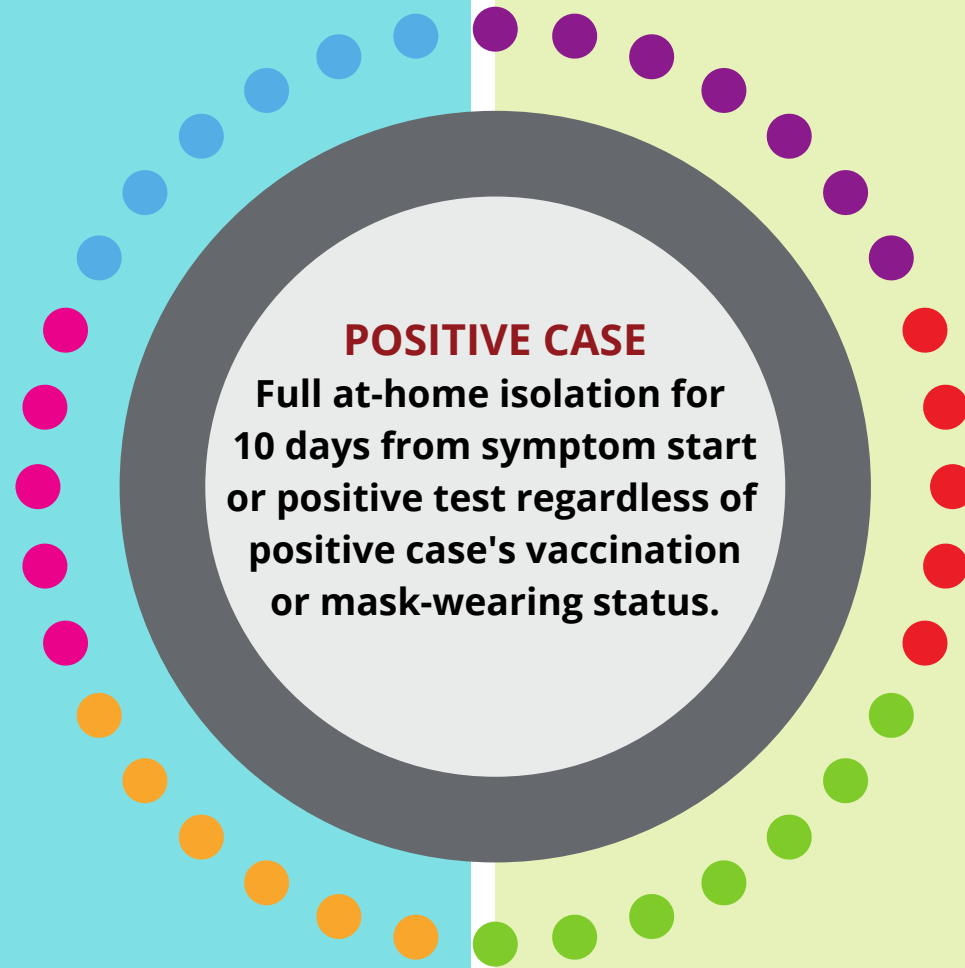

Last updated 10/01/21

Please check with individual school as some schools may choose to be more restrictive than this graphic.

Close contact Asymptomatic UNVACCINATED

- Quarantine for 10 days from exposure.
- Self-monitor for symptoms* for 14 days from exposure date.
- Recommend test on or after **Day 5**.
- If positive, isolate for 10 days from test date or symptom onset (if symptomatic).
- If positive test, contact trace for additional exposure starting 2 days prior to symptom onset.

POSITIVE CASE
Full at-home isolation for
10 days from symptom start
or positive test regardless of
positive case's vaccination
or mask-wearing status.

Close contact Asymptomatic VACCINATED

- No quarantine unless symptoms* develop.
- If symptoms develop, quarantine and get tested for COVID-19.
- Recommend test on after **Day 5**.
- If positive, isolate for 10 days from test date or symptom onset (if symptomatic).
- If positive test, contact trace for additional exposure starting 2 days prior to symptom onset.

If a close contact has symptoms, they should isolate at home and get tested for COVID-19.

*Close contact is defined as within 6 feet for 15 cumulative minutes within a 24-hour period of someone with a confirmed case of COVID-19.
